

WHEN THE ALARM SOUNDS BE CERTAIN YOUR SIGNAL GETS THROUGH

For fire panel communication, no one provides more flexible, more reliable solutions than DMP. The XR500FC™ Fire Panel offers both network and cellular capability. Configure up to eight communication paths in total. DMP technology strengthens communications while significantly reducing costs compared to dial-up.

Equipped with the 4G Digital Cellular Communicator, the XR500FC is UL approved for commercial installations. There's no additional backup required. The Fire Slave Input option of the XR500 has also been approved for fire under UL864, allowing it to be used as a Slave Communicator* for any FACP. When the alarm sounds, you can count on it being heard with FIRE communication solutions from DMP.

*NFPA 72 2007 & 2010 listed
