

XV-24 with AlarmVision™

BENEFITS

REAL EVENTS

- Define **where** you want to detect activity within a camera's field of view.
- Specify **what** activity you want to detect - person, vehicle and/or animal.
- Schedule **when** detection of that activity should trigger a response.

REAL TIME

- Add real time analytic monitoring to your customers' existing video cameras.

REAL RESPONSE

- Deter intruders and unwanted activity by triggering on-site alarms, lights, and/or talk down devices in response to event detection.

REDUCE FALSE ALARMS

- Reduce false alarms and resulting fees with cross zoning and end user/monitoring center video verification.

REMOTE PROGRAMMING THROUGH A SINGLE INTERFACE

- Program cameras, analytics, and panel zones with one interface: Dealer Admin.
- Easy, quick remote setup and maintenance reduces labor and truck rolls.

XV-24 WITH ALARMVISION

INTRODUCING ALARMVISION FROM DMP

- AlarmVision's patent-pending technology seamlessly integrates cameras, analytics and the XR Series™ control panels in one platform to create smart motion detectors that trigger panel responses and alarms in real time.

XV-24 WITH ALARMVISION

- Turn customers' existing cameras into a crime deterrent tool, giving them peace of mind that their property is being actively monitored.
- Add cameras to your existing systems to enhance security.
- Choose the integrated video solution that gives you the power to monitor Real Events in Real Time with a Real Response.

NETWORK DOWN-PROTECTION STILL ACTIVE

- **XV-24 to Panel**
If the external network goes down, the XV-24 and all connected cameras continue to communicate with the XR panel via internal network.
- **Panel to Monitoring Center**
Even if external network drops, the XR panel's back up cell can ensure nonstop alarm communication to the monitoring center and end user, so your customers are always protected.

THE APPLICATIONS ARE ENDLESS

- AlarmVision's deep integration with the XR Series control panels allows you to provide an endless amount of solutions to your customers.

XV-24 SPECIFICATIONS

- Includes person, vehicle and animal analytics
- Supports ONVIF and RTSP cameras
- NDAA compliant
- Connects directly to the network
- Detects cameras on your customer's network
- One TB internal storage
- Up to 24 MP Processing
- Up to four detection regions per camera

How AlarmVision Works
