**Remote Link & System Link Software Update**

---

**December 21, 2000****Version 1.00 Software Update**

Effective December 21, 2000, all Remote Link and System Link software is being shipped from the factory as version 1.00 (12/21/00) software. This version is an update from the 1.00 (12/5/00) software previously available and contains updated operation.

**Updated Operation****Panel Schedules**

Remote Link now sends the correct day-of-week with the opening time of an open/close schedule. Previously, Remote Link would send a day-of-week for the open time other than the day-of-week for the schedule.

**XR10 Area Assignment**

The area number that a zone is assigned to in Remote Link's Zone Information is now correctly sent to the XR10 Command Processor panel. Previously, when a one (1) was entered into Remote Link for the Perimeter area in Zone Information, the panel would receive the Interior area. A two (2) would be received as the Bedroom area.

**Terminating Program**

When communication between Remote Link and a panel is unexpectedly terminated, Remote Link will now allow the operator to close the program. Previously, the operator would have to press Ctrl-Alt-Del to close the program.

**Request Events**

All panel events are acknowledged by Remote Link when requesting events. Previously, arming events were not being acknowledged by Remote Link and the panel would send the event again.

**Host Fail Display**

When using Remote Link's pass-through feature, the status bar at the bottom of the screen now properly displays the Host status. Previously, the Host status always displayed "FAIL".

**Importing Database**

When importing a Remote Access database, Remote Link imports all records from the database. Previously, Remote Link could not import a database containing more than 32,000 records of one type such as zones or users.

**Updating Your Software**

Remote Link version 1.00 (12/21/00) is available free of charge on the DMP Dealer Direct Website at [dealer.dmpnet.com](http://dealer.dmpnet.com). If you are a current user of Remote Link, you will automatically be notified of this update.
