iCOM*SL* Software Update
June 2007

Version 201 Software Update

Effective June 2007, all iCOM*SL* Network Routers are being manufactured with Version 201 (5/31/07) software. This version is an update from the Version 200 (5/1/06) software previously shipped and contains updated operation.

Updated Operation

Output Operation

The switched ground outputs of the iCOM*SL* output now operate properly when assigned to follow a zone.

Previously, when network communication had failed and the iCOM*SL* zone was shorted or opened, the output would follow the zone but the actions of turning on and then off could have been delayed.

Obtaining the New Software

iCOM*SL* software update version 201 (5/31/07) is available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
