Remote Link and System Link
August 2007

Version 1.37 Software Update

Effective August 2007, all Remote Link and System Link software is being manufactured as version 1.37 (8/10/07). This version is an update from the Version 1.36 (5/16/07) previously shipped and contains updated operations.

Updated Operation

Events Request

When an XR500 panel is programmed to communicate to an SCS-105, Remote Link now properly processes the requested dates before beginning an events request using a dialer trap.

Previously, Remote Link would set an incorrect date range causing the panel to return zero events.

Connection Screen

Remote Link now allows the connection screen to close after waiting two minutes when a connection attempt fails and no error message is displayed.

Previously, when the panel did not connect and did not display an error message, the connection screen could only be closed by using the Task Manager.

Internal Contact

When programming Inovonics Wireless zones, the Normally Open checkbox is automatically checked and greyed out when Internal Contact is selected.

Previously, the Normally Open checkbox would be selectable.

Obtaining the New Software

Remote Link and System Link updates version 1.37 (8/10/07) are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer. Hard copy updates on CD can be obtained from buy.dmp.com or by calling DMP Customer Service at 1-800-641-4282.
