

Remote Link and System Link September 2007

Version 1.38 Software Update

Effective September 2007, all Remote Link and System Link software is being manufactured as version 1.38 (9/27/07). This version is an update from the Version 1.37 (8/10/07) previously shipped and contains updated operations.

Updated Operation

Panel Trap

When trapping a panel, Remote Link now allows a remote connect to an XR500 Series panel with a newer version of software than supported by Link.

Previously, the panel would trap but a remote connection could not be established.

Account Group

When sending Account Groups information, Remote Link now allows a remote connect to an XR500 panel in the Account Group that is operating with a newer version of software than supported by Link.

Previously, Remote Link did not allow a connection indicating that the panel version was not supported.

Closing Check Option

Remote Link now displays the "Closing Check" option in System Options when connected to an XRSuper6, XR20 or XR40 Command Processor panel.

Previously, this option was not displayed.

Second Line Test Timer

After creating a new XR500 panel file, Remote Link now allows the Second Line Test Timer to be selected when the 2ND Line is set to 232.

Previously, when creating a new XR500 file, the Second Line Test field was greyed out and not selectable.

User Code

Remote Link now only displays the actual User Code and PIN (Personal Identification Number) for users with CODES VISIBLE authority.

Previously, Link would always display the user codes.

Obtaining the New Software

Remote Link and System Link updates version 1.38 (9/27/07) are available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>. Hard copy updates on CD can be obtained from buy.dmp.com or by calling DMP Customer Service at 1-800-641-4282.
