XR100 and XR500 Series
July 2008

Version 121 Software Update

Effective July 2008, all XR100 and XR500 Series Command Processor™ panels are being manufactured with Version 121 (6/19/08) software. This version is an update from the Version 121 (5/9/08) software previously shipped and contains updated operation.

Updated Operation

Zone Status Display

An FA Series wireless transmitter would always display NORMAL in the Diagnostics Zone State menu, even when the transmitter's zone was faulted.

Keypad Display

When Time Display was set to NO for the keypad and any top row key was pressed at the Status List, the display would advance to ARM   DISARM instead of the list of faulted zones.

Obtaining the New Software

XR100 and XR500 Series software update Version 121 (6/19/08) is available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
