

XT30 and XT50 Series

June 2009

Version 102 Software Update

Effective June 2009, all XT30 and XT50 Series panels are being manufactured with Version 102 (6/16/09) software. This version is an update from the Version 102 (5/14/09) software previously shipped and contains the following new feature.

Feature

GPRS Access Point Name

To take full advantage of the XT Series Version 102 (5/14/09) features such as cellular email/SMS messaging and text command capabilities, all XT30 and XT50 Series panels as of July 15, 2009, will be shipped with a level 400 (yellow) SIM card. The GPRS Access Point Name default has been updated to SECURECOM400 to support the Level 400 SIM card.

For additional information on the Version 102 (5/14/09) software, please refer to DMP Dealer Direct, Feature Update [TU-0506](#).

| |
|----------------|
| FIRST GPRS APN |
| SECURECOM400 |
| - |

First GPRS APN

Enter the first APN (Access Point Name). This allows an access point for cellular communication and is used to connect to a DNS network. The APN may contain two lines of 16 characters to equal 32 characters. Default is set to SECURECOM400.

| |
|-----------------|
| SECOND GPRS APN |
| SECURECOM400 |
| - |

Second GPRS APN

Enter the second APN (Access Point Name). This works as a backup in case the first APN fails. The APN may contain two lines of 16 characters to equal 32 character. Default is set to SECURECOM400.

Obtaining the New Software

XT30 and XT50 software update Version 102 (6/16/09) are available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
