TECHNICAL UPDATE

Remote Link and System Link
March 2010

Version 1.53 Software Update

Effective March 2010, Remote Link and System Link are being manufactured as Version 1.53 (3/22/10) software. This version is an update from the Version 1.52 (1/18/10) software previously shipped and contains new features and updated operations.

Features

XTL Panel

Remote Link and System Link now support the new XTL panel, DMP's smallest panel ever. This compact wireless and cellular panel is perfect for homes and small commercial installations and is still packed with almost all of the popular security features of our full-size DMP panels:

- Designed for fast, reliable installations without pulling a single wire
- Increases your RMR with cellular communication
- On-board cellular communications allows In Touch ™ Messaging Features for any cell phone
- 28 Wireless zones
- Supports up to 8 two-way wireless key fobs or two-way wireless outputs
- Supports 4 fully functional two-way 9000 Series Wireless Keypads
- Supports fully functional two-way 1135 Wireless Sirens

Updated Operations

Event Option

When using System Link with no add-on modules installed, the Event option from the File>Print drop-down menu is now available to view or print events requested from the panel.

Previously, the Event option button was grayed out, preventing the user from printing the events previously requested from the panel.

User Codes

When using Account Groups with System Link, the Group>Send Now option properly sends User Codes, Profiles, Schedules, Output Schedules and Holiday Dates.

Previously, System Link would only send User Codes for Account Groups.

Status Report

Remote Link now properly displays the Activations Status Report when using Link Server.

Previously, Remote Link would display an error when generating the report.

Import/Export Buttons

The buttons at the bottom of the Panel Account Import/Export window are now always available when using a computer with the resolution set to a high DPI mode.

Previously, the Import/Export window was cut off at the bottom and the buttons would not be available.

Obtaining the New Software

Remote Link and System Link updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
