

## 1100 Series Key Fob Transmitters

July 2011

### Hardware Update

Effective July 2011, all 1145, 1146 and 1147 Key Fob Transmitters are being manufactured with Level D hardware.

### Updated Hardware

#### 1100 Series Key Fob

The 1100 Series Key Fob has been enhanced to add tactile switches which provide users immediate click feedback when a button is pressed. This helps to assure the user that the button press has been detected by the key fob. No changes to software operation have been made.

In addition, the model numbers are being revised as the 1145 Series to simplify the ordering process and to indicate the number of tactile buttons included.

Current Model Number	New Model Number	Description
1145-B	1145-4-B	4-Button
1146-B	1145-2-B	2-Button
1147-B	1145-1-B	1-Button

### Availability

The new 1145 Series Key Fobs with tactile switches will become available as soon as inventory of existing 1145, 1146, and 1147 key fobs is exhausted. The estimated date for each is:

1145-4-B: Week of July 11

1145-2-B: Week of August 22

1145-1-B: Week of August 8
