

## XT30/XT50/XTL Series

July 2011

### Version 108 Software Update

The XTL/XT30/XT50 Version 108 (6/27/11) software and Remote Link Version 1.59 (6/24/11) or higher are now available for download on the DMP Dealer Direct Website at <http://dmp.com/dealer>.

Effective July 26, 2011 all XT30/XT50/XTL Series panels are being manufactured with Version 108 (6/27/11) software. As of September 27, 2011, inventory for the XTL, XT30, and XT50 panels will be completely updated to Version 108 (6/27/11) software.

Remote Link Version 1.59 (6/24/11) or higher is **required** to support the features of Version 108.

### Features

#### Use False Alarm Question

A new option for ALL/PERIM and HOME/SLEEP/AWAY arming systems has been added to System Options to allow an alternate display at the keypad when a burglar alarm occurs.

USE FALSE ALARM  
QUESTION? NO YES

#### Use False Alarm Question

Select YES to display IS THIS A FALSE ALARM? NO YES at the keypad in place of CANCEL VERIFY when a burglar alarm occurs. This operates for ALL/PERIM and HOME/SLEEP/AWAY arming systems. Default is NO.

### Updated Operation

#### Cell Signal -dBm

The Cellular Signal Strength diagnostics feature (2313) now provides the numeric value of the cellular signal strength in -dBm on the top line of the display.

SIGNAL:      -xx dBm  
                 ■■■■■■

This display provides the cellular signal strength of the nearest tower for the SIM card carrier. The X's represent the numeric value of the cell signal strength in -dBm. The ■'s represent the signal strength 0-7.

### Obtaining the New Software

XTL/XT30/XT50 Series software updates are available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
