XT30/XT50™ Series and XTL™ Panels
February 2012

Version 109 Software Update

Effective February 14, 2012 all XT Series panels are being manufactured with Version 109 (2/10/12) software. Version 109 (2/10/12) software is now available for download on the DMP Dealer Direct Website at http://dmp.com/dealer.

Updated Operation

Z-Wave programming

When programming the panel to add Z-Wave devices, the panel displayed ZWAVE TABLE FULL and would not allow devices to be added. In order to add a device, the process to remove devices had to be performed. This issue has been corrected.

This issue did not occur when a dealer updated an XT series panel in the field using Version 109 (1/14/12) software. This issue only occurred with panels that were returned to DMP for repair and updated to Version 109 (1/14/12). There were no panels manufactured with this version.

Obtaining the New Software

XT30/XT50 Series and XTL software updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.

As of April 6, 2012, inventory for the XT30/XT50 Series and XTL panels will be completely updated to Version 109 (2/10/12) software.
