HARDWARE UPDATE

XT30/XT50 Series/XTL
March 2012

Hardware Update

Beginning March 2012, all XT30/XT50 Series and XTL panels are being manufactured with upgraded hardware.

- XT30/XT50 Series have updated Level G hardware
- XTL has updated Level E hardware

The updated hardware will begin shipping as current stock is depleted which is estimated to begin early April 2012.

Updated Hardware

Panel Memory

In anticipation of the soon to be released XT30/XT50 Series and XTL Version 110 panel software to support enhanced Z-Wave operation, the internal memory for the panels has been upgraded. This memory upgrade is only needed to support the Favorites and new expanded number of Z-Wave devices beyond the 32 devices already provided. The other Z-Wave features such as the Rediscover function in the new Version 110 panel software does not require this upgrade.

Receiving New Hardware

To update to the latest hardware, return the XT30/XT50 Series or XTL panel to DMP and simply indicate "Update to Latest Hardware Level" on the 5-digit RMA tag. If a panel is returned for other repair needs, this update will be automatically performed as standard repair procedure. If you need RMA tags, contact DMP Customer Service at 1-800-641-4282.
