

## XT30/XT50 Series and XTL Panels

January 2013

### Version 114 Software Update

XT30/XT50 Series and XTL panels Version 114 (12/28/12) software is now available for download on the DMP Dealer Direct Website at <http://dmp.com/dealer>.

Effective January 28, 2013, all XT30/XT50 Series and XTL panels will be manufactured with updated Version 114 (12/28/12) software. As of March 11, 2013 inventory for the XT30/XT50 and XTL panels will be completely updated to 114 (12/28/12) software.

### Features

#### Faster Virtual Keypad App Connection

Improvements have been made to panel cellular communication for the connection speed of the iPhone and Android Virtual Keypad Apps. App users will notice a dramatic reduction in the time required to establish a connection to the panel from the Virtual Keypad App. These improvements apply to all cellular communicators (263G, 263H, 263C) as well as panels with built in cellular communicators.

#### Weather Information

A new option has been added to System Options programming that allows XT30/XT50 Series and XTL panels with cellular or network connections to retrieve local weather data.

ENTER WEATHER  
ZIP CODE:

#### Enter Weather Zip Code

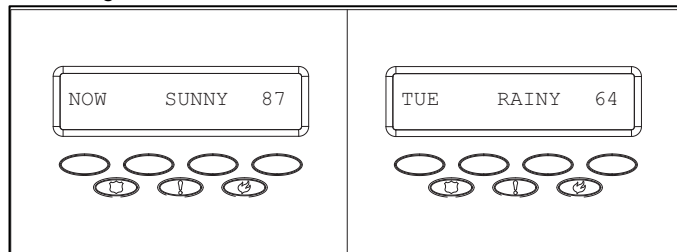

Enter the 5-digit U.S.A zip code where the panel is installed. When a zip code is entered the keypad status list will display the current temperature and conditions followed by the forecasted high temperature and conditions for the next day. To disable this feature, select any top row Select key and press CMD to clear the zip code display. The default is blank.

**7800 Series Keypad**

The Weather Update feature is designed to enhance the new 7800 Series Graphic Keypads. When a graphic keypad is connected to the panel the weather data is displayed in the form of icons on the keypad's main screen.

This feature is also available with the DMP 7000/7100 Series Keypads. The weather data is displayed as part of the scrolling status list on the main screen as shown in the figure below.
