

XT and XTL Series Panels

February 2013

Version 114 Software Update

Version 114 (1/30/13) software is now available for download on the DMP Dealer Direct Website at <http://dmp.com/dealer>.

Effective February 11, 2013, all XT and XTL Series panels will be manufactured with updated Version 114 (1/30/13) software. As of March 25, 2013 inventory for the XT and XTL Series panels will be completely updated to Version 114 (1/30/13) software.

This version replaces the previously released Version 114 (12/28/12). No panels were manufactured or shipped with this version.

Version 114 (12/28/12) was described in Feature Update TU-0667 and featured:

- A faster Virtual Keypad App connection
- Weather Information displayed in the status list for XT Series, XTL and XTLN Panels
- Weather Information icons on the main screen of the 7800 Series Keypads

Version 114 (1/30/13) includes these features, adds Weather Information for XTLN-WIFI panels and provides updated operation as shown below.

Feature

XTLN-WIFI Weather Information

A new option has been added to System Options programming that allows XTLN-WIFI panels to retrieve local weather data. The weather information is displayed as part of the status list on 9000 Series Wireless Keypads.

ENTER WEATHER
ZIP CODE :

Enter Weather Zip Code

Enter the 5-digit U.S.A zip code where the panel is installed. When a zip code is entered the keypad status list will display the current temperature and conditions followed by the forecasted high temperature and conditions for the next day. To disable this feature, select any top row Select key and press CMD to clear the zip code display. The default is blank.

Updated Operation

7800 Keypad Weather Information

Model 7800 Graphic Keypads connected to panels with Version 114 (12/28/12) displayed partly cloudy weather information with a Sun icon during the day and night. Version 114 (1/30/13) now displays a Moon icon during Night hours.

Weather Information Display

XT Series and XTL or XTLN panels that have been updated to Version 114 (12/28/12) in the field, with more than one keypad installed could occasionally display tomorrow's weather forecast as the current weather condition in the keypad status list.

Panels that were updated to version 114 (12/28/12) in the field may be updated to Version 114 (1/30/13).

Obtaining the New Software

XT and XTL Series software updates are available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
