

Virtual Keypad App iPhone

April 2013

Version 3.3.0 Software Update

Effective April 16, 2013, the Virtual Keypad™ App for Apple iPad/iPhone systems has been updated to Version 3.3.0.

Features

Z-Wave Device Edit

The Virtual Keypad App now provides users with the ability to add, remove and rename Z-Wave devices.

- To add a device, select the edit button in the top right corner of any device tab. Select Add and follow the on-screen instructions to add the device to the panel's Z-Wave network.
- To remove a device from the system, select the edit button in the top right corner of the tab containing the device to be removed and select the "X" icon for the device.
- To rename a device select the edit button, select the device to rename and enter a new name.

Note: The Z-Wave Device Edit operation must be enabled by the dealer for each system from vk.securecomwireless.com.

Favorite Actions

App users can now assign Z-Wave favorites to activate based on panel events for XT Series and XR150/XR350/XR550 control panels. Favorites chosen by the user in the Systems Settings menu are sent to the panel and saved in the OUTPUT OPTIONS programming menu of the panel according to the table below.

Note: The Favorite Action operation must be enabled by the dealer for each system from vk.securecomwireless.com.

<i>App Favorite Action</i>	<i>OUTPUT OPTIONS Field</i>
System armed	Armed Output
System disarmed	Disarmed Output
Exit delay started	Begin Exit Output
Entry delay started	Entry Output
Fire alarm	Fire Alarm Output
Panic alarm	Panic Alarm Output
Burglary alarm	Burglary Output

Output Icons

Panel outputs are now displayed in the app with ON/OFF rocker switch icons.

Obtaining the New Software

Virtual Keypad App updates are available for download free of charge from the Apple iPad/iPhone App Store.
