Remote Link and System Link
April 2013

Version 1.67 Software Update

Effective April 5, 2013, all Remote Link and System Link software is being manufactured as Version 1.67 (4/4/13). This version is an update from the Version 1.67 (3/22/13) previously shipped and contains new features and updated operation. If your current Remote Link or System Link software is previous to Version 1.46, update to Version 1.59 before updating to 1.67 (4/4/13).

Important Information: To provide better scalability for growth, SecureCom Wireless has upgraded servers used to provide dealers remote programming of panels over a cellular connection. The SecureCom Wireless server upgrades were completed in November 2012. Older versions of Remote Link prior to version **1.59 (6/24/11)** no longer have the ability to remote program through a panel's cellular connection. If using an older Remote Link version and your company remote programs through a panel's cellular connection, a Remote Link update is required. There is no requirement to update for remote programming if using Remote Link Version 1.59 (6/24/11) or higher.

Features

Updated Splash Screens

The Remote Link and System Link Splash screens and help files have been updated to feature the current DMP logo.

Updated Operation

System Link Demo

When the System Link Demo Version 1.66 (1/2/13) was installed and opened for the first time, the user was incorrectly prompted for a serial number. System Link Demo Version 1.67 (4/4/13) does not require a serial number to operate.

Schedule Types

An error occurred in Remote Link Version 1.67 (3/22/13) when programming Output/Door/Favorite Schedules in XR550 control panels. If the user selected one of the schedule types (Show Outputs, Show Doors, Show Favorites) radio buttons in the Output/Door/Favorite Schedules window, Remote Link displayed the schedules of the selected schedule type for every panel in the database. Remote Link Version 1.67 (4/4/13) only displays the selected schedule type for the panel being programmed.

Obtaining the New Software

Remote Link and System Link Version 1.67 (4/4/13) updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
