

## Remote Link and System Link August 2013

### Version 1.68 Software Update

Effective August 20, 2013, all Remote Link and System Link software is being manufactured as Version 1.68 (8/20/13). If your current Remote Link or System Link software is previous to Version 1.46, update to Version 1.59 before updating to 1.68 (8/20/13).

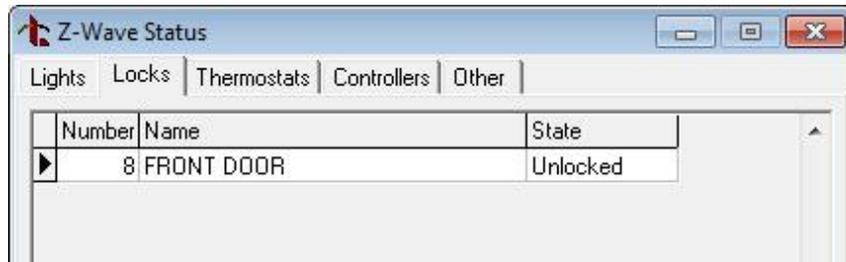

**Important Information:** To provide better scalability for growth, SecureCom Wireless has upgraded servers used to provide dealers remote programming of panels over a cellular connection. The SecureCom Wireless server upgrades were completed in November 2012. Older versions of Remote Link prior to version **1.59 (6/24/11)** no longer have the ability to remote program through a panel's cellular connection. If using an older Remote Link version and your company remote programs through a panel's cellular connection, a Remote Link update is required. There is no requirement to update for remote programming if using Remote Link Version 1.59 (6/24/11) or higher.

### Feature

The following features are available for XR150/XR350/XR550, XT30/XT50 and XTL Series panels with an existing 738Z Z-Wave interface module and Z-Wave devices.

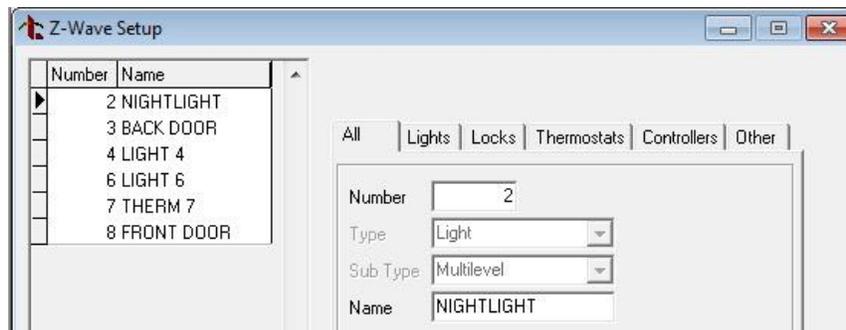

#### Z-Wave Status

The Z-Wave Devices Button in Panel > System Status has been renamed to Z-Wave Status. Each device type tab displays a list of the devices of that type which have been added to the panel. The current state of each device, such as locked or unlocked, is displayed along with the device name.

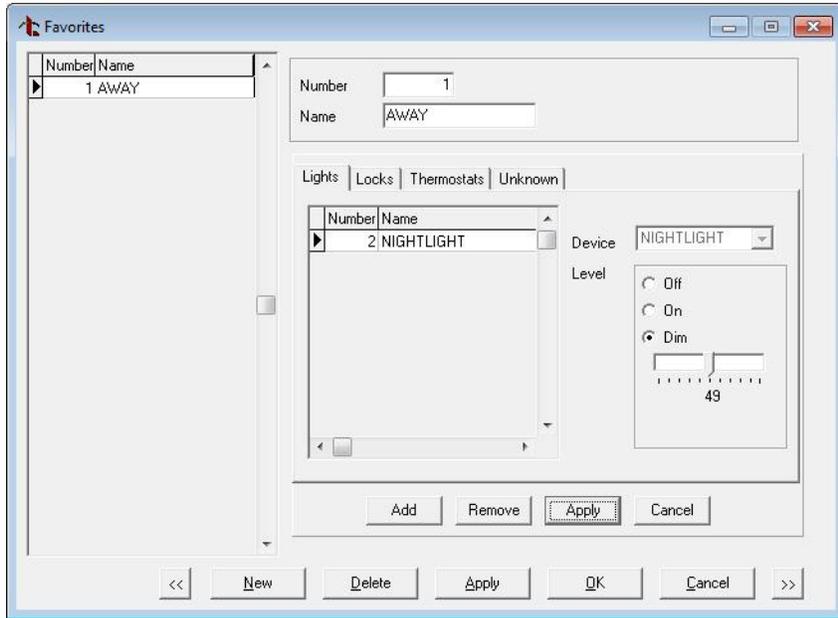

#### Z-Wave Setup

A Z-Wave Setup menu has been added to panel programming options just after Device Setup. The window displays a list of Z-Wave devices programmed in the panel and allows editing of device names. Selecting a device type tab filters the list of devices to display only devices of that type.

## Z-Wave Favorites

A Favorites menu has been added to panel programming options just after Z-Wave Setup. This window allows the operator to create, edit and remove Z-Wave Favorites. 20 Z-Wave Favorites can be programmed for each panel.

## Obtaining the New Software

Remote Link and System Link Version 1.68 (8/20/13) updates are available for download free of charge on the DMP Dealer Direct Website at <http://dmp.com/dealer>.
