FEATURE UPDATE

XT and XTL Series Panels
October 2013

Version 116 Software Update

Version 116 (10/15/13) software is now available for download on the DMP Dealer Direct Website at http://dmp.com/dealer.

Effective November 8, 2013, all XT and XTL Series panels will be manufactured with updated Version 116 (10/15/13) software.   As of December 31, 2013, inventory for the XT and XTL Series panels will be completely updated to Version 116 (10/15/13) software.

Features

Enhanced Weather Display

The weather information displayed in the 32 character keypad status list has been enhanced to include additional information.

Previously, the keypad displayed:

- The current weather condition and temperature
- Tomorrow's forecast condition and temperature

Network Panels

|	
HI 66 LO 59 NOW P-CLOUDY 63	HI 66 LO 61 WED SUNNY 66
Today	**Tomorrow**

For network enabled panels, weather information is updated every hour and the keypad displays the following:

- Today's forecasted high and low temperatures
- The current weather condition and temperature
- Tomorrow's forecasted high and low temperatures
- Tomorrow's forecasted weather condition

Cellular Panels

HI 66 LO 59 TDY P-CLOUDY 66	HI 66 LO 61 WED SUNNY 66
Today	**Tomorrow**

Panels with a cellular connection update four times daily and display TDY in place of NOW followed by today's forecasted weather condition instead of the current condition.
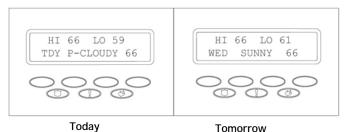

The enhanced weather information will automatically begin to operate as updates to DMP web services are implemented at the end of October.

Z-Wave Setup

The Z-Wave Setup menu has been removed from the panel programming menu and placed in the User Menu. Z-Wave Setup? appears just after Favorites? for Master Level users.

Obtaining the New Software

XT30/XT50 and XTL Series software updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
