Entré Security & Access Management Software
October 2013

Version 7.9.3 D2 Software Update

Effective October 16, 2013, all Entré Security & Access Management software is being manufactured and shipped as Version 7.9.3 D2 (10/8/13).

Updated Operation

Panel Programming

After uploading panel programming from Entre CS Version 7.9.3 D2 (9/23/13) to an XR500 panel operating with Version 211 or earlier software, the programming was formatted incorrectly. This caused some programming fields to contain incorrect information. This issue did not occur when the XR500 was operating with Version 212 software.

Upgrading/Ordering New Software

Entré Security & Access Management Software Version 7.9.3 D2 (10/8/13) will be automatically provided to dealers who have previously purchased an Entre license and are current with their Entre support agreement.
