

## 1103 Wireless Universal Transmitter

February 2014

### Version 107 Software Update

Effective February 27, 2014, all 1103 Wireless Universal Transmitters will be manufactured and shipped with Version 107 (2/24/14) software.

### Updated Operation

#### Disarm Disable

When programming the external contact NORMALLY CLOSED of an 1103 transmitter operating with the recently released Version 107 (1/21/14) software, the Disarm Disable feature would not send a zone open message to the wireless receiver when disarmed and the zone was open for 20 seconds.

Version 107 (1/21/14) software was only shipped in transmitters with a serial number range of:

- 1604518 through 1604877 from 1/30/14 to 2/21/14.

This issue does not affect transmitters that are:

- Programmed with DISARM DISABLE NO.
- Programmed with the external contact NORMALLY OPEN.
- Using only the internal contact.

Please see Technical Update TU-0719 for a complete description of Disarm Disable operation.

### Obtaining the New Software

To update the software in an existing 1103 Wireless Universal Transmitter, return the transmitter to DMP and simply indicate "Update to Current Version" on the 6-digit Repair Authorization Tag. If you need Repair Authorization Tags, contact DMP Customer Service at 1-800-641-4282.
