

XT50 Series May 2014

Hardware Update

XT50 Series panels are now being manufactured with updated Level J hardware. The updated hardware will begin shipping as current stock is depleted which is estimated to occur during June and July 2014 depending on sales volume of specific XT50 models.

Updated Hardware

On-board 1100 Series Wireless

The XT50 on-board 1100 Series Wireless Receiver has been enhanced to offer improved range that matches or exceeds the 1100D Wireless Receiver. This new version can be identified by the Level J marking on the left side of the PCB. In addition, the location of the serial number label has moved to the middle of the PCB.

XT50 Level J hardware will ship with Version 117 (5/20/14) software to compliment the operation of the enhanced hardware.

PCB hardware prior to Level J cannot be updated to this new level.
