XT30/XT50 Series Panels
June 2014

Version 117 Software Update

Version 117 (6/6/14) software is now available for download on the DMP Dealer Direct Website at http://dmp.com/dealer.

Effective June 9, 2014, all XT30/XT50 Series panels will be manufactured with updated Version 117 (6/6/14) software. As of July 25, 2014, inventory for XT Series panels will be completely updated to Version 117 (6/6/14) software.

Updated Operation

Graphic Keypad Display

XT30/XT50 Version 117 (6/6/14) corrects two exit delay countdown timing issues for the 7800 Series Graphic Keypad.

Previously for All/Perimeter or Home/Sleep/Away systems, the Interactive Shield icon of the Home Screen could not be used to arm the system after the following steps occurred:

1. The system had been armed starting the exit delay countdown.

2. An exit type zone was tripped just as the exit delay countdown ended.

3. The entry delay started before the keypad could return to the Home Screen after the exit delay.

4. A user code was entered to disarm.

This issue did not occur on Area systems.

Proper operation was restored to the Interactive Shield icon after the system was armed using the Carousel menu Keypad icon or the system was armed from another keypad.

Also for All/Perimeter or Home/Sleep/Away systems, the Zone Monitor Alert window could have not cleared from the display after the following steps occurred:

1. The system was armed.

2. An exit type zone was tripped starting the Entry Delay and displaying ENTER CODE: - on the keypad.

3. A user code was entered to disarm.

4. Before ALL SYSTEM OFF was displayed, a zone with Zone Monitor enabled was tripped causing the Zone Monitor Alert to display.

This issue did not occur on Area systems.

Proper operation was restored after a keypad power cycle.

Obtaining the New Software

XT30/XT50 Series software updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.
