

## XT30/XT50 Series June 2015

### Hardware Update

XT30/XT50 Series panels are now being manufactured with updated Level L hardware. The updated hardware will begin shipping as current stock is depleted which is estimated to occur during late June and early July 2015 depending on sales volume of specific XT30/XT50 models.

### Updated Hardware

#### J6 Expansion Header

A seven position locking header (J6) has been added to the right side of the PCB near the Reset header. This EXP connection will be used to support the future release of the Model 763N-WiFi Communication module.

PCB hardware prior to Level L cannot be updated to this new level.
