FEATURE UPDATE

Virtual Keypad App Android
July 2015

Version 4.6 Software Update

Effective July 13, 2015, the Virtual Keypad™ App for Android systems has been updated to Version 4.6.0 Software.
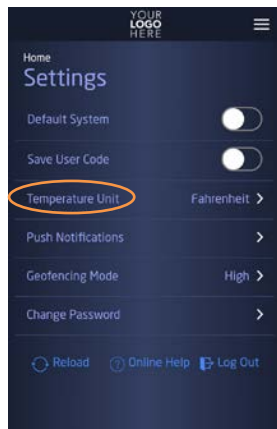

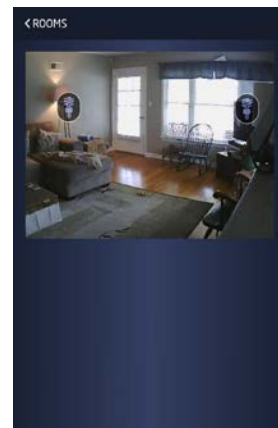

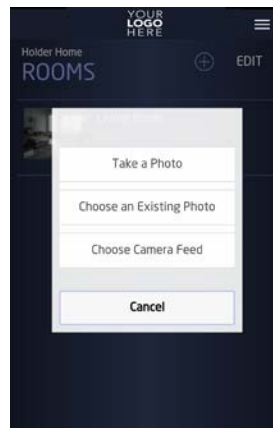

Features

Rooms

Virtual Keypad Android App Version 4.6 now supports creating rooms by taking a picture from your phone's camera, choosing an existing photo stored on your smart phone, or from a live camera feed from your system.

Take a Photo – Tap on Take a Photo to take a picture with the phone's camera.

Choose an Existing Photo – Tap on Choose an Existing Photo to choose a stored phone.

Camera Feed - Tap on Camera Feed to view the camera list. Tap a camera. If the camera is a Pan/Tilt camera, the sliders on the screen allow you to tilt the camera up and down or pan the camera from side to side to set the position for this room.

Tap on the screen to place hotspots to assign a Z-Wave device. Once assigned to a hotspot, you can change the condition of the Z-Wave device by tapping the hotspot.

Temperature Unit

The Vitual Keypad Android App Version 4.6 now supports Fahrenheit or Celcius temperature unit display on the thermostat screen. Tap on Settings to open the Settings Screen. Tap on Temperature Unit to toggle from Fahrenheit to Celcius or Celcius to Fahrenheit.

Obtaining the New Software

Virtual Keypad App updates are available for download free of charge from the Google Play Store.
