FEATURE UPDATE

MyVirtualKeypad.com™ Browser
August 2015

Version 1.7 Update

Effective August 21, 2015, the MyVirtualKeypad.com™ Browser has been updated to Version 1.7.

Features

This feature is compatible with the following:

- XT30/XT50/XTL Series control panels operating with Version 122 or higher firmware
- XR150/XR350/XR550 series control panels operating with Version 109 or higher firmware

Reports

The MyVirtualKeypad.com™ Browser now provides a Reports tab. The Reports tab has two report options available:

Quick Reports

- Today's System Events – all system events for today's date
- All Troubles and Alarms - last 60 days of all troubles and alarms
- All Systems Users – current list of users from the system
- Arming/Disarming Exceptions - last 60 days of the following events:
  - Late to Open
  - Early to Close
  - Late to Close

Custom Reports

- Systems – select the system(s) for the report
- Type - All events or specific events for the report
- Range - Today (default) or choose from the drop down list

Enable Reports

Reports will need to be enabled for each system in Virtual Link by the dealer for each App User. To enable Reports, click on an App User from the Customer's Account and then check the box next to any available panels for the selected App User.
