XTLC/XTLN

August 2015

Version 123 Firmware Update

XTLC/XTLN Version 123 (8/27/15) firmware is now available for download on the DMP Dealer Direct Website at http://dmp.com/dealer.

Effective September 1, 2015, all XTLC/XTLN panels will be manufactured and shipped with updated Version 123 (8/27/15) firmware.

Fast Program Option

A new FAST PROGRAM option has been added to the Programming Menu to allow complete panel programming using only essential programming options. When the panel programming defaults are acceptable for installation and only basic programming options are needed, FAST PROGRAM allows the installer to quickly enter information without navigating all of the programming menus. The new FAST PROGRAM option has been added immediately after the INITIALIZATION and before the COMMUNICATION programming option. The new one page Fast Programming Sheet is included in this feature update.

FAST PROGRAM

FAST PROGRAM

The Fast Program section allows you to quickly configure the essential settings for XTLC/XTLN control panels. When the panel programming defaults are acceptable for installation and only basic programming options are needed, FAST PROGRAM allows the installer to quickly enter information without navigating all of the programming menus. After choosing FAST PROGRAM, continue programming the basic list of options:

- Account Number
- First IP Address
- App Key (XTLN only)
- System (Area, A/P, or H/S/A)

- Hours from GMT
- Weather Zip Code
- Alarm Sounder 1 Serial # (Output 41)
- Zone Wireless Serial Number(s)

Once all wireless zone serial numbers have been programmed, press the back arrow to display FAST PROGRAM. Press COMMAND and STOP is displayed. Press any Select key to save and exit the programming menu.

Note: All standard programming options are still available in the programming menu.

Fast XTLC and XTLN Programming Sheet

New Fast XTLC and XTLN Programming Sheets are also included with each panel and contain only the fast programming sections for a quick and easy installation.

- Fast XTLC Programming Sheet LT-1095F
- Fast XTLN Programming Sheet LT-1238F

Note: The XTLC and XTLN Programming Sheets and Programming Guides provide the default information (BOLDED) for each control panel and descriptions for each programming step.

- XTLC Programming Sheet LT-1095
- XTLN Programming Sheet LT-1238

- XTLC Programming Guide LT-1108
- XTLN Programming Guide LT-1221

Output Setup

The Output Information programming option has been renamed to Output Setup.

Obtaining the New Software

XTLC/XTLN Series software updates are available for download free of charge on the DMP Dealer Direct Website at http://dmp.com/dealer.

Name _____ Account Number _____ Date _____

Address _____ City _____ State _____ Zip _____

Communication

Account Number   _ _ _ _ _   (1 to 65,535
                             default = **12345**)

First IP Address   _ _ _ . _ _ _ . _ _ _ . _ _ _

System Options

System   AREA   **A/P**   H/S/A

Hours from GMT   _ _   (0 to 23 hrs., default = **6**)
