Virtual Keypad^{TM} App iPhone
October 2015

Version 4.8 Software Update

Effective October 19, 2015, the Virtual Keypad™ App for Apple iPad/iPhone systems has been updated to Version 4.8 Software.
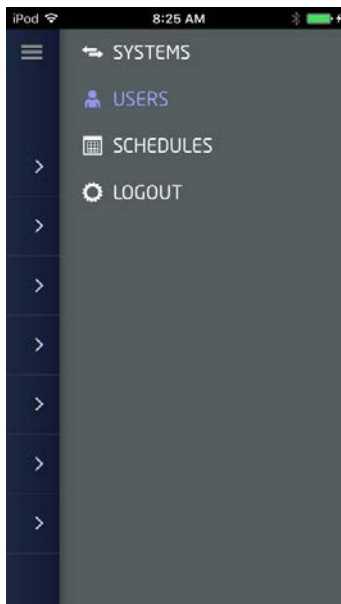

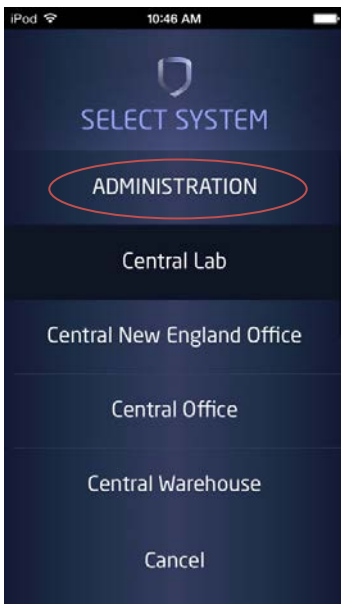

Feature

The following feature only displays when the App User has been given Administration Authority Level by the dealer on the Vk.securecomewireless.com Dealer Admin site. Please see the Technical Update for Vk.securecomwireless.com (TU-0818) for more information on Authority Level options.

This feature is compatible with the following systems:

- iOS version 8.0 or higher operating system

Multi-System Administration

The Virtual Keypad App iPhone Version 4.8 now provides an Administration login to allow multi-system changes for Users and Schedules without having to go into each system individually. The Administration login has the following tab options available:

Users

The Users tab displays the user names and email addresses of the selected system for adding, editing or deleting from all or any of the customer's systems.

Schedules

The Schedules tab displays the schedules of the selected system for adding, editing or deleting from all or any of the customer's systems.

Obtaining the New Software

Virtual Keypad App updates are available for download free of charge from the Apple App Store.
