
V-4408D 8-Channel Network Video Recorder**August 2016**

Version 3.3.3 Update

Effective August 24, 2016, the V-4408D 8-Channel Network Video Recorder (NVR) is being manufactured and shipped as Version 3.3.3 (8/8/16).

Updated Operation**Channel Stability**

With Version 3.3.3, the NVR's channel stability has been improved to ensure that system cameras reconnect to the correct channels after a power loss. When a system comes back online, cameras will automatically connect to their original channels.

Connection Options

The NVR now supports the addition of SecureCom and compatible ONVIF cameras while connected anywhere on the customer's local network. Cameras and wireless access points no longer need to be connected directly to the NVR's LAN ports. See the updated SecureCom Video V-4408D 8-Channel NVR Installation Guide (LT-1419) for more details.

Obtaining the New Firmware

Contact Technical Support at 1-888-4DMPTEC and select the Software Group to obtain the new firmware.

2G Network Shutdown

Do you have all your 2G accounts upgraded already? The end of 2G is near. On December 31st, 2016, all AT&T 2G systems will cease to operate. This will affect your XT and XTL Series panels with built-in GSM cell modules, as well as your 263G and 463G cellular modules.

For all SecureCom Wireless customers, we have customized reports available to you that list your current 2G communicators still in use.

Get your company's custom report by emailing CustomerService@securecomwireless.com or calling us at 877-300-8030. Find out which of your accounts are still on 2G and update them before it's too late.
