Virtual Keypad App™ Android and iOS

August 2016

Version 5.3 Software Update

Effective August 31, 2016, the Virtual Keypad App™ is updated to Version 5.3 for Android and iOS Software.

Features

Updated Thermostat (Android & iOS)

The **Thermostats** tab has been updated in both iOS and Android apps. The new design allows end users to page between multiple thermostats by swiping left or right. It also offers new color schemes that correlate with the thermostat's temperature settings. See Figures 1 through 3 for the Auto, Heat, and Cool displays.

Home Tab (Android & iOS)

The Virtual Keypad App now offers a customizable **Home** tab. The first time users visit the **Home** tab, the app will ask them if they would like to make the **Home** tab their start screen. Users can select their most frequently used favorites and cameras and add them to the **Home** tab for easy access.

Apple Watch Support (iOS Only)

With Version 5.3, the Virtual Keypad App™ offers support for the Apple Watch. Below are the three ways users can interact with their system though their Apple Watch.

Arming and Disarming

By tapping the **Arming** icon on the home screen, users can choose to arm or disarm their system. The watch retrieves system information and displays the arming options available. Different arming options appear depending on the type of system. See Figures 4 through 6.

History

Tap the **History** icon on the Home screen to display the 50 most recent system events. See Figure 7.

Favorites

Tap the **Favorites** icon to display a list of programmed favorites. When a specific favorite is tapped, the watch displays **Activating…** while the command is being sent. See Figures 8 and 9.

Obtaining the New Software

Virtual Keypad App™ updates are available for download free of charge from the Google Play Store and the App Store.

2G Network Shutdown

Do you have all your 2G accounts upgraded already? The end of 2G is near. On December 31st, 2016, all AT&T 2G systems will cease to operate. This will affect your XT and XTL Series panels with built-in GSM cell modules, as well as your 263G and 463G cellular modules.

For all SecureCom Wireless customers, we have customized reports available to you that list your current 2G communicators still in use.

Get your company's custom report by emailing CustomerService@securecomwireless.com or calling us at 877-300-8030. Find out which of your accounts are still on 2G and update them before it's too late.

Visit https://www.dmp.com/2GSunset/ for more information.
