

October 2016

Version 1.4.13 Update

Effective October 17, 2016, the Dealer Admin Site (dealeradmin.securecomwireless.com) is updated to Version 1.4.13 (10/17/16).

Features

Video Quality Settings

The Dealer Admin Site offers new options for adjusting video quality when using a SecureCom Wireless camera or NVR. This allows dealers to reduce video quality in situations that require cameras to use less bandwidth. To use these settings, navigate to the Dealer Admin Site and add or edit a camera. Select **Low**, **Medium**, or **High** from the drop-down menu. See Figure 1.

The screenshot shows the 'Editing Camera' configuration page. It includes fields for 'Name*' (Front Door), 'Server Name or MAC Address*' (C42F90234CD3), and 'Time Zone*' (Central Time (US & Canada)). Under the 'Options' section, there are three toggle switches: 'Observe DST' (checked), 'Flip Image' (unchecked), and 'Record on Alarm' (unchecked). A 'Video Quality' dropdown menu is highlighted with a blue border and set to 'Medium'. Below this, the 'Clips' section has three toggle switches: 'Always Record Motion' (checked), 'Never Record Motion' (unchecked), and 'Record Motion When Armed' (unchecked). At the bottom right, there are 'Cancel', 'Delete', and 'Save' buttons.

Figure 1: Video Quality Settings

Refer to the chart below for setting specifications:

| Video Quality Setting | Resolution | Maximum Bitrate |
|-----------------------|------------|-----------------|
| Low | 640 x 480 | 256 kbps |
| Medium | 640 x 480 | 512 kbps |
| High | 704 x 480 | 1024 kbps |

Added NVR Permissions

Version 1.4.13 (10/17/16) offers expanded local user permissions for the SecureCom Video™ V-4408D 8-Channel NVR.

2G Network Shutdown

Do you have all your 2G accounts upgraded already? The end of 2G is near. On December 31st, 2016, all AT&T 2G systems will cease to operate. This will affect your XT and XTL Series panels with built-in GSM cell modules, as well as your 263G and 463G cellular modules.

For all SecureCom Wireless customers, we have customized reports available to you that list your current 2G communicators still in use.

Get your company's custom report by emailing CustomerService@securecomwireless.com or calling us at 877-300-8030. Find out which of your accounts are still on 2G and update them before it's too late.
