February 2017

Version 1.5.2 Update

Effective February 13, 2017, the Dealer Admin Site (dealeradmin.securecomwireless.com) is updated to Version 1.5.2 (2/13/2017). As of Version 1.5.2 (2/13/2017), the following features are now available.

Dealer On-Demand Settings

With Version 1.5.2 (2/13/2017) of the Dealer Admin Site, all on-demand monitoring settings have been moved to the **On-Demand Settings** section in the side menu. Now, you can set up on-demand monitoring offerings in one convenient place by entering the following information:

- **Notify Dealer E-mail** - Enter the email where you would like to receive dealer notifications that on-demand monitoring has started and stopped.
- **Receiver Reports** - Select which receiver reports are enabled for all systems with on-demand monitoring. These reports will only be received when a system is being monitored.
- **Payment** - This section shows whether or not a Stripe account is connected.
- **On-Demand Daily Pricing** - The pricing options available for all systems with on-demand monitoring enabled. Dealers can add up to three customizable options. Options are automatically checked when they are added. Un-checking an option makes it unavailable when adding on-demand monitoring to a system or editing a system that already has on-demand monitoring.

Note: Dealers with more than three options set up prior to Version 1.5.2 (2/13/2017) will be able to maintain their options, but will not be able to add more.

Figure 1: On-Demand Monitoring Settings

System On-Demand Monitoring

To add on-demand monitoring to a specific system, navigate to the **System Information** page, select **Edit**, and check the **On Demand Monitoring** box. The following options appear:

- **Charge** - Select a pricing option for the system's on-demand monitoring. These options are set in the **On-Demand Settings** section.
- **Notify Email (Customer)** - Enter the email where the customer would like to receive notifications that on-demand monitoring has started and stopped.

Camera Firmware Version

You can now view the current firmware version for all cameras. Navigate to the **System Information** page and select a camera. The **Firmware Version** is shown at the bottom of the camera information section.
