

Remote Link™

March 2018

Effective March 30, 2018, all Remote Link software will be updated to Version 1.82 (03/20/2018). If your current Remote Link software is previous to Version 1.46, update to Version 1.59 (available at DMP.com/Dealer_Direct) before updating to Version 1.82 (03/20/2018).

Features

LTE Support

You can now use Remote Link to activate LTE SIM cards. In Remote Link panel communication programming, select **Cellular Network** as the **Communication Type** and select the **Activate** button. Enter the necessary account information and select **LTE SIM** as the **SIM Type** to activate an LTE SIM card. See Figure 1.

Batch Account Group Maintenance

Remote Link 1.82 allows you to perform account group maintenance tasks in batches. You can add, change, or remove accounts in an account group and send that information to multiple account groups at one time, giving you a more powerful tool to manage accounts in Remote Link.

To use this feature, select **File** in the top menu and select **Account Group Information**. Select a **Group Name** in the **Account Groups** window and the accounts in that group display. Select the **Batch** button. See Figure 2.

Improvements

Faster Direct Connect

With Remote Link Version 1.82 (03/20/2018), the direct connect feature drastically reduces the amount of time Remote Link takes to connect to cellular panels.

Obtaining the New Software

The Remote Link Version 1.82 (03/20/2018) update is available for download, free of charge, on the DMP Dealer Direct Website at DMP.com/Dealer_Direct.
