

## FEATURE UPDATE | JULY 2018

### Version 8.0 (7/9/18) Update

Effective July 11, 2018, all Entré Security & Access Management software will be manufactured with updated Version 8.0 (7/9/18) software.

### Features

#### Version 181 Support

Entré Version 8.0 now supports XR150/XR550 Series panels running firmware Version 181.

#### Opening/Closing Reports

Using Entré, you can now program Opening/Closing Reports for individual areas. This new functionality allows you to control which area can send opening and closing reports to the central station when an area is disarmed or armed. After retrieving the panel, this option will now display in Area Options.

#### Enhanced Lockdown

Using Entré with XR150/XR550 Series systems running Version 181, you can now program panic zones to trigger a Lockdown. This new feature allows users to quickly put a system in a locked-down state by triggering a panic zone. Program a panic zone to use Lockdown functionality in Zone Information.

#### Feature Key Support

Entré Version 8.0 now allows you to view existing feature keys and activate new feature keys.

#### Cellular Path

Entré Version 8.0 can now send programming changes to a panel over a cellular network path. Using current firmware, it allows for programming and user updates to be sent in the event of a network failure. To use this functionality, go to System Configuration then DMP Communications. Once here, enable the Cell Module option.

#### Flash Upgrade

Entré Version 8.0 now allows you to flash upgrade XR150/XR550 Series panels using standard network communication.

### Updated Functionality

#### Editing Profiles

With Entré Version 8.0, changes made to profiles will only be sent to associated panels, decreasing the amount of time it takes to update a panel's profile information.

### Obtaining the New Software

Entré Security & Access Management software Version 8.0 (7/9/18) is provided to dealers who have previously purchased an Entré license, are current with their Entré support agreement, and who have an Entré Certified Technician.

To upgrade to Entré Version 8.0 (7/9/18), please have the completed [Pre-Upgrade Checklist \(LT-1782\)](#) ready before contacting the Software Support Team in DMP Technical Support at 888.436.7832.

**Important Note:** The firmware is named **XR550020180627.ru** on the [DMP.com/Software\\_Downloads](#) page. Once the download is complete, re-name the file to **XR550.ru** and place it in the firmware directory.

Additional Entré information and documentation can be found at [DMP.com/Entre](#).
