Version 1.7.2 Update

The Tech APP is updated to Version 1.7.2. The following features are available.

Features

Panel Version 181 Support

The Tech APP Version 1.7.2 now supports XR150/XR550 Series and XT30/XT50, XTLplus™, and XTLplus-GW Series panels running panel Version 181 firmware.

Lockdown Override

A new user profile option is available called Lockdown Override. Any user who has Lockdown Override and Sensor Reset enabled in their profile will have the ability to return a locked-down system back to its previous state. Users with their profile programmed this way can simply perform a Sensor Reset to remove the system from its locked-down state.

Obtaining the New Software

Tech APP updates are available for download free of charge from the Google Play Store and the App Store.

Important Note: If you have already updated to an earlier version of iOS Tech APP 1.7.1, you will need to update to Version 1.7.2 that is currently in the App Store to get this feature.
