Version 6.17 Update

Effective January 10th, 2019, the Virtual Keypad™ App is updated to Version 6.17 for iOS and Android devices. The following features are available.

Features

User Photos Push Notifications

Virtual Keypad 6.17 allows you to assign user photos to user codes. Photos can be used in the **Events** tab and **History** tab. You can also receive push notifications including the user photo on your mobile device every time that user is involved in an event. Notifications that occured prior to a user photo being assigned will not feature the photo.

Snooze Push Notifications

With Version 6.17 on iOS devices, you can snooze sensor activity for a selectable period of time with the Snooze feature found in the **Settings** tab, or by expanding the notification.
