

### NEW FEATURES ⊕ | UPDATED FUNCTIONALITY ⬆ | MARCH 2019

## Version 191 Firmware Update

Version 191 (3/8/19) firmware is now available on [DMPDealerAdmin.com](http://DMPDealerAdmin.com) or for download at [DMP.com/Dealer\\_Direct](http://DMP.com/Dealer_Direct).

Effective March 25th, 2019, all XR150/XR550 Series Panels will be manufactured with Version 191 software.

## New Features

### ⊕ Cellular Entré Connection

With Version 191, your panel can now communicate to Entré via a cellular path. Cellular can be used as a primary or backup path to Entré. This feature can be programmed in **Remote Options**.

### ⊕ IPV6 Support

Panels now support IPV6 addresses and allow communication with the SCS-VR via IPV6.

### ⊕ Instant Zone Type

With Version 191, a new Instant zone type can be found in **Zone Information**. The Instant zone type does not follow the entry or exit delay of its assigned area. If the zone is tripped during the entry/exit delay, the alarm will be triggered instantly.

### ⬆ Increased Door Schedules

The number schedules for doors has increased from 8 to 16 with Version 191.

### ⬆ Expanded Temporary User Operation

Start dates can now be added to a Temporary User. Once a Temporary User has reached its expiration date, the user will go inactive. Temporary user codes can be configured in **User Codes**. See the XR Series System User Guide ([LT-1278](#)).

### ⊕ Lockdown Output

The Lockdown Output activates when a lockdown is initiated, and turns off when the lockdown is cleared via a sensor reset. This output can be enabled in **Output Options**.

### ⬆ Updated Wireless Keypad Support

Version 191 allows up to 7 wireless keypads to be programmed into a single XR Series panel.

### ⬆ Burglary Bell Output Programming

The Burglary Bell Output has been moved out of global area settings into individual area programming.

### ⬆ Improved Battery Circuit Monitoring

Version 191 has resolved an issue where on rare occasions a low panel battery would be reported even though the panel battery was not low.

## Supporting Software Updates

- **Remote Link Version 1.90** - Remote Link 1.90 now supports cellular Entré connections, IPV6 programming, the new Instant zone type, increased door schedules, improved temporary user operation, lockdown output, wireless keypad support, and Burglary Bell Output programming. The update is available for free at [DMP.com/Dealer\\_Direct](http://DMP.com/Dealer_Direct).
- **Dealer Admin Version 2.16.1** - Dealer Admin Version 2.16.1 now supports cellular Entré connections, IPV6 programming, the new Instant zone type, increased door schedules, improved temporary user operation, lockdown output, wireless keypad support, and Burglary Bell Output programming.
- **Tech App Version 2.2.3** - Tech App Version 2.2.3 now supports the Instant zone type, wireless keypad support, and improved temporary user operation.

## Obtaining the New Firmware
