734 Version 105, 734N/734N-POE Version 103

Effective August 7th, 2019:

- 734 Wiegand Interface Modules are being manufactured with firmware Version 105 (6/27/19).
- 734N Wiegand Interface Modules are being manufactured with firmware Version 103 (6/27/19).
- 734N-POE Wiegand Interface Modules are being manufactured with firmware Version 103 (6/27/19).

Updated units will begin shipping on October 3rd, 2019. The following feature is available:

Feature

Improved Multiple Card Format Capability

To use this feature, XR150/XR550 Series must be updated to firmware Version 192 or higher.

Choose how cards are programmed into a system: **DMP**, **CUSTOM**, or **ANY**.

- **DMP** allows you to use DMP format.
- **CUSTOM** disables DMP format and allows you to program slots 1-8 in any compatible card format.
- **ANY** allows all Wiegand card reads to activate the door strike relay and sends no user data to the panel.

If **CUSTOM** is selected, the format that is programmed into slot 1 is the default format. In the event that a card with an unrecognized format is programmed when adding a credential, that card will be read in the format that is programmed in slot 1. To restrict card reads to specific formats, only program slots 2-8.

Obtaining the New Hardware

New 734, 734N, and 734N-POE Wiegand Interface Modules can be ordred by contacting DMP Customer Service at 1.866.266.2826 or by visiting buy.dmp.com.
