Version 2.30.0 Update

Effective September 17th, 2019, Dealer Admin™ (dealer.securecomwireless.com) is updated to Version 2.30.0. The following feature is available:

Feature

System Test

System tests available to technicians in the Tech APP are now available in Dealer Admin. You can perform the following system tests:

- **Communications Test—**Perform a communication test with the panel according to connection type. For example, test a primary Network connection and a backup Cellular connection.

- **Standard Walk Test—**Perform a standard walk test of a system's programmed zones.

- **Wireless Check In Test—**Perform a test to determine whether programmed wireless devices are checking in with the panel.

- **Z-Wave Diagnostics Test—**Perform a diagnostics test to determine whether Z-Wave devices are communicating with the panel. Tests up to 10 devices at a time.

- **Z-Wave Device Optimization—**Optimize a system's Z-Wave mesh network.

For more information about system tests, refer to the appropriate panel programming guides.
