

## FEATURE UPDATE | MARCH 2020

### Version 1.94 Update

Effective March 12th, 2020, all Remote Link™ software will be manufactured with Version 1.94 (3/6/20). The following features are available:

### Features

#### Panel Version 193 Support

Remote Link now supports the following features from XT Version 193 and XR Version 193:

- Programmable EOL
- Celsius Temperature Option
- Expander Device Type
- Custom Action Delay Option and Notification Settings

For more information, refer to the [XT Version 193 Feature Update](#), [XR Version 193 Feature Update](#), and the appropriate product installation guides.

#### XT/Com Series Version 194 Support

Remote Link now supports the following feature from XT/Com Version 194:

- **Increased Number of User Codes:** The number of user codes that can be stored in iComSL, CellCom, and DualCom Series Communicators has increased to 99.

### Improvements

#### Access Point Name (APN) Support

When configuring cellular communication or remote options in previous versions of Remote Link, the user was required to enter both the **First GPRS APN** and **Second GPRS APN**. Remote Link now only requires the user to enter the **First GPRS APN**.

#### Improved Support for Low Resolution Screens

Changes have been made to improve the display of Remote Link on screens with resolutions of 1366 x 768 (768p) and lower.

### Obtaining the New Software

Remote Link Version 1.94 (3/6/20) is available for download, free of charge, at [DMP.com/Dealer\\_Direct](https://www.dmp.com/Dealer_Direct).
