Version 8.7.0 (6/12/20) Update

Effective June 12, 2020, all Entré Security & Access Management software will be manufactured as Version 8.7.0 (6/12/20).

Entré 8.7.0 works with panel firmware Versions 181 to 201.

Features

Supports XR Version 201 Firmware
Entré 8.7.0 supports and comes bundled with XR Series Version 201 firmware. See the XR Series Version 201 Technical Update TU-1139.

7463 Network Keypad Support
Entré 8.7.0 supports the 7463-W Network Thinline LCD Keypad with Prox Reader firmware Version 101 or higher.

Integrator Passphrase Option Replaces Integrator Checkin Minutes
With XR Series Version 201, Integrator Checkin Minutes has been removed from Remote Options and is replaced by Integrator Passphrase.

Improvements

Password Expiration for Web Client
Enables the operators profile to expire after the set amount of days indicated in **Configuration** > **System Configuration** > **Password Policy**. If it is past the days indicated, the operator is notified of the expiration when logging into the web client as well as the desktop client.

Variable Buffer Size
Entré 8.7.0 sizes its data being sent to the panel to never exceed the panel buffer when sending user codes. This prevents the panel from experiencing an error and going offline in Entré.

Obtaining the New Software

Entré Security & Access Management software Version 8.7.0 is provided to dealers who have previously purchased an Entré license, are current with their Entré support agreement, and who have an Entré Certified Technician.

To upgrade to Entré Version 8.7.0 (6/12/20), please complete the Pre-Upgrade Checklist (LT-1782) before contacting the Software Support Team in DMP Technical Support at 888.436.7832.
