Version 8.7.3 (10/30/20) Update

Effective November 2, 2020, all Entré Security & Access Management software will be manufactured as Version 8.7.3 (10/30/20).

Entré 8.7.3 works with panel firmware Versions 181 to 201.

Features

Delete Personnel and Associated Credentials

Previously, you had to delete a badge and personnel separately. Now, you have the ability to delete both at the same time. This saves time and helps with accuracy.

1. Right click on the **Personnel** record.
2. Select **Delete**.
3. Select **OK** to delete all associated credentials or **Cancel** to close the message window.

Right-Click Function for Hardware Tree

Like the Hardware List, a right-click on the Hardware Tree displays a drop-down menu for added functionality and ease-of-use.

Create Areas from the *Edit - Panel* Screen

To create a new area, navigate to **Edit - Panel** and select **Add Area**. Fill in the necessary information and press **Save**.

Reassign Zone to a Different Area

With Entré 8.7.3, you can assign a zone to a different area.

1. Navigate to **Edit - Panel**.
2. Select the **Zones** tab.
3. Right-click on the Zone Number you want to change.
4. Under the **General** tab, in the **Parent** field, select the different area from the dropdown menu.
5. Save and close the window.

Manage Driver Functions per Operator Profile

For each operator profile, you can allow or disallow functions for each driver.

Added CSV Wizard Capabilities

CSV Wizard now allows you to modify and delete personnel records and associated data.

Improvements

Use Next Available Profile Number and User Number

When profile and user numbers have been deleted unsequentially and a new profile or user is being created, Entre 8.7.3 uses the next available number instead of the next incremental number. For example, if profile number 5 is deleted out of profiles 1 - 10, then when creating a new profile number the software will pick number 5 as the next available number instead of number 11.

Window Scaling

When opening a module within a screen, the window sizes properly for the resolution of the screen.

Obtaining the New Software

Entré Security & Access Management software Version 8.7.3 is provided to dealers who have previously purchased an Entré license, are current with their Entré support agreement, and who have an Entré Certified Technician.

To upgrade to Entré Version 8.7.3 (10/30/20), please complete the Pre-Upgrade Checklist (LT-1782) before contacting the Software Support Team in DMP Technical Support at 888.436.7832.
