Version 212 (6/23/21) Update

Updated Version 212 (6/23/21) firmware is now available on Dealer Admin (dealer.securecomwireless.com) or for download from DMP's Product Software Downloads.

Panel Features

EasyConnect Improvement

This update improves the performance of an EasyConnect system when an invalid code is entered from Virtual Keypad™ a single time and then left open with no further activity. Under this condition, if the local network lets stale TCP connections expire in less than 12 minutes, a panel reset would be required before further Virtual Keypad connections would be allowed.

Updated Version 212 (6/23/21) addresses this issue by restarting keep alive messages more quickly.

Obtaining the New Firmware

XT Series firmware updates are available, free of charge, on Dealer Admin (dealer.securecomwireless.com) or for download from DMP's Product Software Downloads.
