

Firmware Version 200 Update

Effective December 14th, 2022, all 1103 Wireless Universal Transmitters are shipping with Version 200 Firmware. This allows all 1103 transmitters the ability to be programmed using encrypted or unencrypted communication.

To enable encryption, wireless receivers must have Version 300 firmware or higher.

Note: The 1103E part number has been discontinued.

Obtaining the New Firmware

New 1103 Wireless Universal Transmitters with Version 200 Firmware can be ordered by contacting DMP Customer Service at 1-866-266-2826 or by visiting buy.dmp.com.
