Version 308 Firmware Update

DMP is now shipping 7000 Series Keypads manufactured with Version 308 (8/19/19) firmware.

Feature

Improved Multiple Card Format Capability

To use this feature, XR150/XR550 Series must be updated to firmware Version 192 or higher.

Choose how cards are programmed into a system: **DMP**, **CUSTOM**, or **ANY**.

- **DMP** allows you to use DMP format.

- **CUSTOM** disables DMP format and allows you to program slots 1-8 in any compatible card format.

- **ANY** allows all Wiegand card reads to activate the door strike relay and sends no user data to the panel.

If **CUSTOM** is selected, the format that is programmed into slot 1 is the default format. In the event that a card with an unrecognized format is programmed when adding a credential, that card will be read in the format that is programmed in slot 1. To restrict card reads to specific formats, only program slots 2-8.

Obtaining the New Firmware

To order the new 7000 Series Keypads with Version 308 (8/19/19) firmware, contact DMP Customer Service at 1.866.266.2826 or by visiting buy.dmp.com.
