

Version 192 Firmware Update

Version 192 (6/26/19) firmware is now available on dealer.securecomwireless.com or for download at DMP.com/Dealer_Direct.

Effective August 5th, 2019, all XT Series Panels will be manufactured with Version 192 software. The following features are available.

Features

⊕ Doorbell Zone Type

With Version 192, a new Doorbell (DB) zone type can be found in **Zone Information**. The Doorbell zone type supports the 1108 Doorbell Module and is intended for use with zones that are assigned to doorbells. When the doorbell zone type is triggered, the Westminster chime will sound on graphic keypads and 1136 wireless remote chimes.

⊕ 1168 Wireless Smoke/CO Support

Version 192 has been updated to support the 1168 Wireless Smoke/CO combo unit, which is available for pre-order now. The fire alarm will sound the Temp 3 cadence and the CO alarm will sound the Temp 4 cadence. The 1168 also has a built-in temperature sensor that will notify users when the temperature drops below 41 degrees.

⊕ Zone Monitor Output

With Version 192, a new Zone Monitor output can be found in **Output Options**. This output turns on momentarily when a zone monitor tone is activated. If zone monitoring is turned off, the zone monitor output will not trigger.

Enhancements

⬆ Zone Monitor for Icon Keypads

Version 192 resolves an issue where Icon keypads would not sound during zone monitor.

⬆ Checkin Defaults

Checkin times on new panels are factory defaulted to 0.

⬆ LTE Modem Support

XT Series panels will no longer display NO TOWER in the diagnostics menu for LTE modems when it should be displaying NO SIGNAL or NOT REGISTERED. The panel will now check the signal strength of the LTE modem and will display NO SIGNAL if the modem cannot connect to the tower, and NOT REGISTERED if the LTE modem has not been registered with SecureCom Wireless.

Supporting Software Updates

- **Dealer Admin Version 2.25** - Supports the doorbell zone type, 1168 Wireless Smoke/CO Detector, Zone Monitor Output, and Encanced Z-Wave Support.

Obtaining the New Firmware

XT Series firmware updates are available, free of charge, at dealer.securecomwireless.com or DMP.com/Dealer_Direct.
