VirtualKeypad.com Version 2.12

Effective May 2, 2019, VirtualKeypad.com is updated to Version 2.12. The following features are available:

Features

XR Version 191 Expanded Temporary User Support

Start dates can now be added to a Temporary User. Once a Temporary User code has reached its expiration date, the user's status is changed to inactive. Temporary user codes can be configured in **User Codes**.

XR Version 191 Expanded Door Schedules Support

The number of door schedules has increased from 8 to 16 for XR panels with Version 191 or higher.

Improved Administrator Tools

Administrator tools have been updated to automatically select relevant systems when editing a specific user.

To access administrator tools, log in to VirtualKeypad.com and select **Admin** near the upper right corner of the page.

Requirements

Expanded Temporary User Support and Door Schedules Support require that XR Series panels are updated to firmware Version 191 or higher.

Obtaining the New Software

Panel firmware updates are available from DMPDealerAdmin.com and DMP.com/Dealer_Direct.
