Version 2.18 Update

Effective April 4, 2019, Dealer Admin™ (DMPDealerAdmin.com) is updated to Version 2.18. The following feature is available:

Feature

Dealer Analytics

Dealer Analytics help you monitor the growth of your business with detailed metrics for all your systems and customers. Dealer Analytics includes an overview and details section.

In the overview, you can view a summary of customer and system information for the current month and year, or the totals for each item. For example, view the number of customers added this month, this year, or in total.

You can view more information for each category in the details section, including number of systems installed, new customers, and access control metrics. The details section includes data from both the current month and last month for quick comparison.

In addition to viewing Dealer Analytics in Dealer Admin, you can subscribe to have full reports delivered by email every day, week, or month, depending on the option that you choose.

No updates are required to access this feature. However, Dealer Analytics are only available for Dealer Admin users with administrator privileges.
