Version 2.16.3 Update

Effective March 21, 2019, Dealer Admin™ (DMPDealerAdmin.com) is updated to Version 2.16.3. The following features are available:

Features

System Analytics

System Analytics has been updated to show hourly cell signal and cell tower ID. You can use this feature to more precisely troubleshoot cellular communication issues.

This feature requires that panels are updated to firmware version 191.

Remote Sensor Reset

Dealer Admin now supports resetting sensors to restore door access and schedules following a lockdown.
