Entré Security & Access Management Software

Version 8.2 (1/25/19) Update

Effective January 30, 2019, all Entré Security & Access Management software will be manufactured with updated Version 8.2 (1/25/19) software.

Features

1122 PIR Motion Detector Support

Entré Version 8.2 supports the 1122 Wireless PIR Motion Detector. You can add the 1122 to Entré and modify settings such as contact, supervision time, PIR pulse count, and PIR sensitivity.

Carbon Monoxide (CO) Zone Type and Temporal 4 Bell Cadence Support

Entré Version 8.2 supports XR150/XR550 Series panel firmware Version 183 features. With Version 183, carbon monoxide detectors have a designated Carbon Monoxide (CO) zone type. For a CO Zone Type, the default bell cadence is Temporal 4, which can be programmed in Bell Options. From the Status List programming section in Entré, you can specify which keypads you want Carbon Monoxide Zone types to display on during Alarm and Trouble events.

Multiple Card Formats

With Version 8.2, you can now program multiple card formats from Entré. This feature is only for XR150/XR550 Series Panels Version 183 and higher. You can program card formats from the panel edit section as well as from within the door devices in Entré. With Version 8.2, you can program up to seven different card formats in addition to DMP format.

Obtaining the New Software

Entré Security & Access Management software Version 8.2 (1/25/19) is provided to dealers who have previously purchased an Entré license, are current with their Entré support agreement, and who have an Entré Certified Technician.

To upgrade to Entré Version 8.2 (1/25/19), please complete the Pre-Upgrade Checklist (LT-1782) before contacting the Software Support Team in DMP Technical Support at 888.436.7832.

Additional Entré information and documentation can be found at DMP.com/Entre.
